

AQUADET

Chlorinated Alkaline Cleaner

FEATURES

- Hard water compatible
- Rapid soil removal
- Cleaning & sanitising action
- Low foaming
- Free rinsing properties
- HALAL approved
- KOSHER approved

AREAS OF USE

- Hospitals
- Hotels & motels
- Restaurants
- Cafeterias
- Domestic use

DESCRIPTION

AQUADET is a chlorinated alkaline detergent designed for use in automatic dishwashing machines. It combines high alkalinity of potassium hydroxide and sanitising properties with soil cutting power of sodium hypochlorite to produce an ultra heavy duty detergent for areas of the plant where cooked on food residues prove difficult to remove.

DIRECTIONS FOR USE

AQUADET is used in automatic dishwashers and must not be used for washing dishes by hand. AQUADET should be dispensed via Jasol electronic dosing equipment and when used in conjunction with SPOT AID will give optimum ware washing results. Place a drum near machine and connect the input hose. Switch on machine and allow the feeder to bring the level of wash to correct a detergent concentration: for dishwashing machines 2-6mL/L of water (60-80°C).

Consult your Jasol Representative for further technical information.

SAFETY INFORMATION

AQUADET is classified as Hazardous according to the GHS. AQUADET is classified as Dangerous Goods according to the ADG Code (7th Ed). AQUADET is a Scheduled Poison according to the SUSMP. Avoid contact with eyes and skin. Refer to SDS for further information.

FIRST AID INFORMATION

If poisoning occurs contact a doctor or **Poisons Information Centre Australia, Phone 13 11 26**. If swallowed do NOT induce vomiting. Wash out mouth thoroughly with water and seek immediate medical attention. If in eyes, hold eyelids apart and flood with water for at least 15 minutes. If on skin, remove contaminated clothing and wash affected area with running water. Seek immediate medical attention.
