

HYDROCHLORIC ACID 33%

Processing Aid

FEATURES

- Highly concentrated
- Rapid pH reduction response
- Convenient to use

AREAS OF USE

- Dairy processing plants
- Food processing plants

DESCRIPTION

HYDROCHLORIC ACID 33% is an acidic solution used for pH adjustment in dairy and food processing industries. Can be used as a pre-cursor in combination with sodium chlorite for chlorine dioxide generation.

DIRECTIONS FOR USE

Use rates depend upon a number of factors, such as desired pH, the type of system and others.

Please, consult your Jasol representative for further information.
